

KholoPlex no.5
3D IONIC
RECONSTRUCTIVE PROTEIN MOUSSE

Made In Italy
200ml e 6.76 fl.oz.

KholoPlex
— MADE IN ITALY —

A nutrient, hydrating, reconstructive, porosity control mousse enriched with natural grain 3D hydrolyzed amino acids. Our anti-inflammatory vegetal amino acid complex protects hair from free radicals and extreme heat. It moisturizes, shields and soothes while leaving hair protected, hydrated, full of body, bounce and shine.

MULTI FUNTIONAL MOUSSE:

- There are no limits to the benefits when applied to hair before, during and after chemical services... to enhance color, shine and elasticity.
- Can be mixed directly with oxidation color for extra hydration and more luminous, brighter colors.
- Can be applied to hair before hair coloring and toning to balance porosity, extra protection and hydration.
- Before and after permanent wave services for more soft, elastic and vigorous curls.
- Apply before heat styling for extra protection and control.

Three-Dimensional Ionic-Amino-Keratin that stratifies a network of reticular disulfide links generating multifaceted 3D hair bond and cuticle reconstruction indicated as a restoration therapy for lifeless hair as it rebuilds the disulfide bond with amino acids and proteins. Hygroscopic Polymer substances that readily attract water through adsorption and act as hydration magnets to maintain hydration to maximize elasticity.

Hydrolyzed Wheat Protein will greatly increase the hair's ability to retain moisture, add volume, and reduce hair's porosity while improving its smoothness. It is known to confer improved comb-ability, smooth feel (silky feel), moisturization and help maintain the natural structure of hair, and it can replenish the voids within the hair's structure with cysteine and prevent further weakening of the fiber.

Rice Bran oil's ample supply of vitamin E repairs and builds tissues, it can help reduce inflammation and repair damage to the hair follicles, which in turn can enable healthy hair growth. Hydrolyzed Rice Protein has been shown to significantly increase total hair volume by up to 32%. It also adds natural shine and highlights to the hair. By increasing the ability of the hair and skin to bind moisture, it leads to increased flexibility and tensile strength.

Honey has both emollient and humectant properties, making it a great hair moisturizer. Emollients smooth the hair follicles, adding shine to dull hair. Humectants bond with water molecules, adding moisture to dry strands. By moisturizing and locking in shine, honey can help restore the natural luster of your hair.

Amodimethicone is a protective emulsion that provides improved deposition of the active ingredients across the entire hair shaft resulting in improved shine, conditioning, frizz control, softness and improved hair elasticity, decreased fly-aways, improved coverage and spread-ability, improved wet and dry combing and improved formula stability and sensory feel.

Cetrimonium chloride. This cationic compound and conditioning agent is mainly used to prevent static and buildup in hair. It has excellent anti-static, anti-frizz & detangling properties, especially effective for softening coarse hair. It neutralizes and eliminates odor by preventing the growth of microorganisms and enabling water to mix with dirt and rinse away.

Triethanolamine is found naturally occurring in green tea and chicory, it is a wonderful pH adjuster and buffering agent, it has excellent conditioning properties and creates a beautiful rich foam and viscosity
